

SUPRIYA SALONI

Business Analyst | Data Analyst | SQL | Python | Excel | Visualization-Tools | Business Intelligence & Analytics

+91-7818055142 | supriyasaloni1111@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Business & Data Analyst with hands-on experience at Cisco Systems using SQL, Excel (VBA, Pivot Tables, Power Pivot, Array Functions), and Python to deep-dive into large operational datasets, identify trends and anomalies, and drive process improvement. Skilled at translating business questions from stakeholders into structured analysis requirements and building self-serve reports and dashboards that give teams real-time visibility into key metrics. Proactively upskilled in data analytics through a dedicated certification program (PW Skills), deepening SQL, Python, and Power BI capabilities. Experienced with data pipelines and ETL monitoring (Snowflake), predictive modeling, and comfortable leveraging AI-assisted tools to accelerate analysis and automate repetitive reporting.

PROFESSIONAL EXPERIENCE

Business Analyst Trainee — Cisco Systems (India) Pvt. Ltd.

Dec 2022 – Dec 2023

Global CX Strategy & Planning – Business Intelligence Team

- Analyzed large-scale operational data (~4,000–5,000 records) using SQL, Excel (Pivot Tables, Array Functions), and Snowflake to identify trends, anomalies, and data quality issues for the ESI project.
- Partnered with stakeholders during business requirements discussions, translating functional requirements into structured analysis requirements and clean, actionable reporting solutions.
- Retrieved, cleaned, and aggregated data from multiple sources using SQL and Python, transforming raw data into structured, actionable datasets for analysis.
- Built and maintained a self-serve TAC CSAT reporting dashboard in Tableau, eliminating a manual reporting process and giving 4–5 key stakeholders consistent, real-time visibility into performance metrics.
- Supported the Cisco NPS initiative by delivering knowledge-transfer training to 10 team members and creating analytical PowerPoint decks to present findings and recommendations to cross-functional stakeholders and leadership.

Business Analyst — Social Prachar, Hyderabad

Jan 2022 – Jul 2022

- Retrieved and aggregated admission data (501 records, 9 attributes) from multiple sources, cleaning and structuring it through exploratory data analysis and feature engineering.
- Conducted exploratory and statistical analysis to identify key factors influencing admission outcomes, translating findings into clear, data-driven business recommendations.
- Built and evaluated predictive models using Python and cross-validation techniques, achieving 81% accuracy in forecasts and supporting scenario-based analysis for stakeholders.

PROJECTS

Employee Performance Dashboard — Personal Project (Excel)

[GitHub](#)

- Built an interactive Employee Performance Dashboard in Excel (150 records, 9 attributes) to track working hours, efficiency, and break time across employees.
- Used Pivot Tables, Pivot Charts, and Slicers for dynamic filtering and drill-down into individual performance metrics; applied conditional formatting and array formulas (SUM, AVERAGE, IF) to highlight top and low performers.

Customer Shopping Behavior Analysis — Personal Project

[GitHub](#)

- Analyzed a large customer shopping behavior dataset (5,050 records, 17 attributes) using Python and SQL to identify purchasing patterns and behavioral trends.
- Queried and aggregated customer-level data using SQL for structured analysis, then built a Power BI dashboard and a formal report to communicate key insights to stakeholders.

TECHNICAL SKILLS

- **Languages & Databases:** SQL (Joins, Window Functions, Subqueries), Python (NumPy, Pandas, Matplotlib), MySQL, Excel (Pivot Tables, Advanced Formulas, Charts)
- **Visualization & Reporting:** Tableau, Power BI, PowerPoint, Automated Reporting & Dashboard, Data Storytelling, Stakeholder Communication
- **Data Analysis:** Data Discovery & Cleaning, EDA, Root-Cause Analysis, Predictive Modeling & Forecasting, Statistical Analysis
- **Business & Program Analysis:** Requirements Gathering, Process Flows & Design Documents, KPI Tracking, Process Improvement

CERTIFICATIONS & CONTINUING EDUCATION

- UPSC Data Processing Assistant Exam — Preparation (Dec 2023 – Jul 2025)
- Data Analytics Certification — PW Skills (Aug 2025 – Present)
- Business Analytics Master's Program — Simplilearn
- SQL (4-Star), Python (3-Star) — Hacker Rank
- Cisco Certified Network Associate (CCNA)

EDUCATION

Bachelor of Technology – Computer Science

Aug 2018 – Jul 2022

JP Institute of Engineering and Technology, Meerut, Uttar Pradesh

Supriya Saloni

Business & Data Analyst

Turning messy operational datasets into interactive dashboards and clear executive decisions.

Cisco Systems Experience

Ex-Business Analyst Trainee · BI Team · TAC CSAT Dashboard

5+ Analytics & ML Projects

Power BI, SQL, Python, Excel & Tableau Interactive Dashboards

B.Tech Computer Science

JP Institute of Engineering and Technology (2018 - 2022)

Certified & Ranked

IIT Kanpur Python · Cisco CCNA · 4-Star SQL HackerRank

About me

I specialize in working with large, messy operational data and transforming it into clear, executive-ready analysis and self-serve dashboards.

At Cisco Systems, I used SQL, Excel, and Python to identify trends, outliers, and data anomalies, replacing manual reporting workflows with automated Tableau dashboards for key stakeholders. I enjoy sitting with cross-functional teams to translate business problems into structured analytics solutions.

Cisco Systems

Business Analyst Trainee
(2022 - 2023)

Core Toolset

SQL · Python · Power BI ·
Excel · Tableau

Education

Science

Experience

○ Business Analyst Trainee

Cisco Systems (India) Pvt. Ltd. · Global CX Strategy & Planning, BI Team

Dec 2022 – Dec 2023

- Analyzed large-scale operational datasets (~4,000–5,000 records) using SQL, Excel, and Snowflake for the ESI project.
- Collaborated with stakeholders to gather business requirements and deliver structured reporting solutions.
- Built and maintained a self-serve TAC CSAT Tableau dashboard, retiring manual reporting and providing real-time visibility to 4-5 stakeholders.

- Conducted knowledge-transfer training for 10 team members supporting the Cisco NPS enablement initiative.

Business Analyst

Social Prachar, Hyderabad

Jan 2022 – Jul 2022

- Cleaned and analyzed university admission data (501 records, 9 attributes) using Python for exploratory analysis and feature engineering.
- Built predictive regression models achieving 81% forecast accuracy, supporting scenario-based analysis for admission counseling.

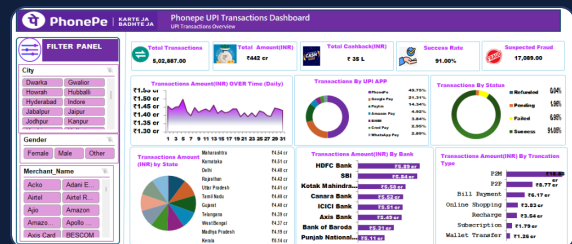

Projects

Amazon Global Sales Dashboard

Power BI · SQL · Excel

Analysis of Amazon's global sales data (2012–2015) covering 31K orders and \$2.26M in total sales across 5 markets and 3 customer segments.

PhonePe UPI Transactions Overview

Excel (Pivot Tables · Slicers · Pivot Charts)

Interactive Excel dashboard analyzing 5,02,887 UPI transactions worth ₹442 Cr across apps, banks, states, and merchant categories.

- Created dynamic Pivot Tables and Slicers to filter by City, Gender, and Merchant.

- Cleaned and prepared data in Excel, aggregated via SQL for market breakdowns.
- Built an interactive Power BI dashboard with KPI cards, regional maps, and profit analysis.

Key insight: Asia Pacific leads at 31.59% of sales; Consumer segment generates 51.94% of revenue. Identified negative profit items highlighting pricing issues.

[View on GitHub →](#)

- Visualized app market share (PhonePe 49.75%, GPay 21.31%) and leading banks (HDFC ₹5.89 Cr).

Key insight: Maintained 91% success rate with 17,089 suspected fraud cases identified; P2M transactions dominated over P2P.

[View on GitHub →](#)

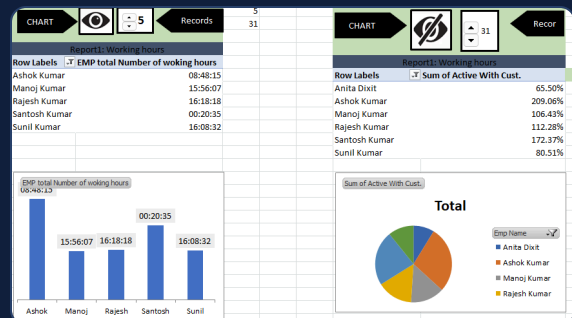

Customer Shopping Behavior Analysis

Python · SQL · Power BI

End-to-end analytics project on 5,050 customer records across 18 attributes exploring purchasing frequency, ratings, and revenue drivers.

- Queried customer metrics in MySQL; conducted EDA in Python (Pandas, Seaborn).
- Built Power BI dashboard with category, demographic, and discount

Employee Performance Dashboard

Excel (Pivot Tables · Charts · Conditional Formatting)

Workforce analytics dashboard monitoring working hours, break distributions, and active customer interaction percentages.

- Engineered interactive chart toggle switches and record selectors in Excel.

slicers.

Key insight: Headphones generated highest revenue (\$138K) but had low ratings (3.08), whereas Jewelry had the highest rating (3.76) with lower sales volume.

 [View on GitHub →](#)

- Compared working hours and productivity benchmarks to support appraisal cycles.

Key insight: Pinpointed extreme performance variation (from 209% top efficiency to 65.5%), enabling targeted management coaching.

R^2 0.82

81% Forecast Accuracy · Cross-Validated

University Admission Prediction

Python (Scikit-learn · Pandas · NumPy · Seaborn)

Machine learning predictive model built on 500 student records with 9 academic attributes (GRE, TOEFL, CGPA, Research, SOP, LOR).

- Conducted correlation analysis revealing CGPA and GRE scores as primary drivers.
- Trained and cross-validated Linear Regression models achieving 81% prediction accuracy.

Key insight: Research experience and strong SOP/LOR significantly elevated admission chances for competitive university tiers.

Achievements

Python Certification — IIT Kanpur

Certified in Python programming and data applications by IIT Kanpur.

Cisco Certified Network Associate (CCNA)

Globally recognized networking and infrastructure certification by Cisco.

HackerRank Badges

4-Star in SQL and 3-Star in Python for algorithmic problem solving and database querying.

Gold Medalist in Basketball

Secured 1st place and gold medal in competitive basketball tournaments.

Stand-up & Comedy in College

Featured comedian and performer recognized across college cultural festivals and events.
